

English Markdown to PDF Demo

Language-aware cover, TOC, callouts, and MathJax sizing

This short document verifies that lang: en produces an English, LTR PDF shell while still allowing Persian text inside the body.

It also compares inline math with display math.

Note

This callout title should be English because the document language is English.

This paragraph contains inline math such as $E = mc^2$, $T = 500$, and $\epsilon = 0.05$. The formulas should stay visually aligned with the surrounding text.

این جمله فارسی است و باید داخل سند انگلیسی همچنان خوانا بماند، بدون اینکه پوستهی کلی PDF راست‌به‌چپ شود.

■ Display Formula

The display formula below should be centered and larger than inline formulas:

$$\int_{-\infty}^{\infty} e^{-x^2} dx = \sqrt{\pi}$$

■ Code Block

PYTHON

```
print("Language-aware Markdown to PDF")
```
